SOLUTIONS FOR GROWTH

Anticipate demand and optimize revenue

Recommendation Engines

Build customer loyalty with personalized travel & planning recommendations

Dynamic Pricing

Anticipate event-based surges to empower demand-based pricing and maximize revenue potential

Workforce & Inventory Optimization

Prevent overwhelmed staff and plan ahead for upcoming events

Target Marketing

Drive more bookings targeting traveling high-spending music lovers

LIMITLESS APPLICATIONS AND OPPORTUNITIES

Accommodation Providers

Popular music events draw travelers and high demand for location specific accommodations.

Anticipate demand and price accordingly with JamBase's live music data.

Filter for events by geography and artist popularity to identify target dates for surge pricing, and advertising to live music travelers.

Rideshare

Drivers need to know when and where to find potential riders, and concert attendees lack confidence they'll be able to find a ride home.

JamBase Data identifies dates and locations of high-attendance music events to inform drivers where to be and when.

Ride availability and demand pricing are maximized and riders are better served.
